Education

Indian Institute of Technology(IIT), Patna **4 August 2023 – 31 May 2027(*expected*)**

Bachelor of Technology in Mathematics and Computing; ***CGPA: 7.03*** *Patna, India*

- Courses: Data Structures and Algorithms(DSA), Machine Learning(ML), Object Oriented Programming, Database Management System (SQL and Relational Database), Probability and Statistics, Numerical Linear Algebra, Discrete Mathematics, Computer Architecture

Senior Secondary (CBSE): Percentage: 91.2% **2023**

Experience

IIT Patna's CCDC Website | Temporarily deployed website **18 February 2025 - 28 March 2025**

- **Tech Stack: React, NextJs, TypeScript, Vercel**
- Engineered the official IIT Patna CCDC (Centre for Career Development and Counselling) website.
- Crafted a responsive UI, optimized performance with Next.js SSR, and ensured a seamless user experience.
- Launched successfully on Vercel, with planned migration to **ccdc.iitp.ac.in** domain for official institutional deployment.

Projects

OneIITP (App Development) | | PlayStore | | AppStore | | OneAttend **22 August 2024 – Present**

- **Tech Stack: React Native, Firebase, JavaScript, Microsoft Azure, Expo, React, Vercel**
- Created IIT Patna's official student app serving **2,000+ active users**, streamlining campus activities.
- Executed a **QR-based anti-proxy attendance system** with auto-updating codes, reducing proxies by **90%**.
- Designed **OneAttend** web portal for professors to track and manage attendance details with analytics dashboard integrated with Google Sheets.
- Integrated **Azure authentication** and **Google Sheets API** for real-time bus schedules, improving convenience by **30%**.
- Produced features including timetables, attendance tracking, marketplace, and campus resources, increasing engagement by **40%**.
- **Impact: 15,000+ reads**, **1,500+ downloads**, **4.5/5** rating, and campus-wide adoption.

WinRegi - AI-Powered Windows Settings Explorer) | | Github Link | | Demo Video **5 March 2025 - Present**

A self made AI-powered control center that simplifies Windows customization by instantly finding and applying settings, registry tweaks, and PowerShell commands based on user queries.

- **Tech Stack: Python, PyQt, SQLite, Watchdog, Windows API & Registry, NLP, Machine Learning**
- Crafted an **AI-powered** Windows settings explorer with **natural language search**, reducing setting location time by **70%**.
- Leveraged **Windows API** for system configurations and implemented **Registry modifications**, improving optimization by **50%**.
- Constructed an **SQLite database** for user preferences with **hot reloading**, reducing development time by **30%**.
- **Open Source:** Published on GitHub with **Git** version control and **CI/CD pipelines**.
- **Impact:** Enhanced settings navigation, improving user productivity by **40%**.

VaultX (Full Stack Development) | | Frontend | | Backend | | Deployed Link **9 March 2025 - 25 March 2025**

- **Tech Stack: React, NextJS 13, TypeScript, Prisma ORM, Node.js, Postgre SQL, JWT, Shadcn UI, Tailwind CSS**
- **Architected** secure banking platform with **2FA** and real-time logging, reducing unauthorized access by **90%**.
- **Designed** transaction system with **role-based access**, enabling **secure transfers** and **loan processing** with **99.9%** accuracy.
- **Built** real-time **alerts** for security events and transactions, improving threat response by **70%**.
- **Implemented** multi-factor **email verification** for sensitive actions, reducing fraud attempts by **85%**.
- **Developed admin dashboard** for loans and security, cutting management time by **60%**.

Skills

- **Languages/Database:** Python, OOPS, **JavaScript**, **TypeScript**, **Kotlin**, **SQL(MySQL, PostgreSql)**, **Mongodb**, C, **C++**
- **Tools: Git, Github**, Puppet, **Google Colab**, **Firebase**, **Postman**, **Vercel**, **Netlify**, Figma, **Prisma ORM**
- **Frameworks: Tailwind**, **ReactJS**, **NextJS**, **React Native**, **NodeJS**, **Expo**, Android Studio
- **Libraries: React**, **Pandas**, **Numpy**, SocketIO, **MatplotLib**, Seaborn, PyTorch, XGBoost, FastAPI, **PyQt**, **OpenCV**
- **Language and Additional Skills:** English: Independent (CEFR - B2), Quick learner with enthusiasm for acquiring new skills

Achievements

- **Specialist** on **Codeforces**
- Secured top **0.76%** among 1.1 million students in **JEE Advanced 2023**
- Selected for **Summer of Bitcoin 2025**; currently working on a project '**Braidpool**' under an assigned mentor.
- Achieved **1,858** rank among **37,100** participants in **Codeforces Round 995 (Div. 3)**
- Ranked **under 30** in Bihar Zone in **NTSE Stage 1**

Positions of Responsibility — Volunteer Experience

Dev Lead for Cyber Security Problem Statement: *ICTC 3.0* **10 March 2025 - 5 April 2025**

– *Deployed Website Solution* *Problem Statement*

Dev & Design Team: *Inter IIT Cult 2024, IIT Patna* **December 2024**

Project Lead: *OneIITP App Development* **22 August 2024 - Present**

Certifications

GenAI Study Jams 2024: Google Developer Groups IIT Patna **5 August 2024**
